DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/11/2007 has been entered.

Information Disclosure Statement

2. The information disclosure statement filed 7/11/2007 is acknowledged by the examiner.

Response to Arguments

3. Applicant's arguments with respect to claims 1, 5, 7-9, and 13-18 have been considered but are moot in view of the new ground(s) of rejection.

Election/Restrictions

4. Claims 2-4 and 10-12 remain withdrawn from consideration due to the restriction mailed 7/12/2005.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 5, 9, 13, 15, 17, and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 6,131,879 (Kluge et al.). Kluge et al. disclose a piezoelectric valve comprising

Art Unit: 3753

an air valve main body (74), a pressure chamber (within element 74), an air outlet (72), a valve body (62), a piezoelectric element (40), a pair of displacement enlarging mechanisms (below the reference number 122 in figure 6), wherein the displacement enlarging mechanisms and the piezoelectric element are mechanically connected (elements are attached in figure 6), a valve seat (on the surface of 68 adjacent element 62), a base plate (68), a pair of hinges (adjacent the arrows on element 40), and a pair of arm members (below reference number 122 in figure 6).

Allowable Subject Matter

7. Claims 7, 8, 14, and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
